**Subject:** Response to Information Request Concerning Niagara Falls Boulevard/Holy Trinity Cemetery Sites

Hi Megan,

When we last spoke in October, you indicated that Union Carbide Corporation was finishing up a review of its records for documents responsive to EPA's Information Request concerning the Niagara Falls Boulevard and Holy Trinity Cemetery Sites. Please let me know the status of this review and whether additional documents responsive to the Information Request had been identified. During our call, you also mentioned that UCC was attempting to locate responsive Atomic Energy Commission licenses and, to that end, had contacted state archives. Please let me know if the AEC licenses have been found.

Thank you,

Margo
